Math a Way of Thinking (MWTh) • Grades 3-6

- Provides methods, materials and activities for helping children learn mathematics.
- Helps teachers develop a framework for implementing the use of a child-centered curriculum.
- Provides experiences which help teachers evaluate the value of other materials and programs.
- Emphasizes the implementation of the **Common Core and NCTM Standards for School Mathematics**, including the NCTM mandate for Algebra for everyone.
- Provides a set of problem solving skills that are not grade level specific and which encourage creativity and divergent thinking.
- Focuses on helping teachers redefine their role from that of teachers of arithmetic to teachers of mathematics.

The Mathematics a Way of Thinking book is not available from the Center for Innovation in Education. It is only available through Amazon.com or other sites discoverable through Google searches. There is a PDF copy of the book available as a free download from the Center's website. Click on the Mathematics a Way of Thinking book cover on the Home page to asccess the free PDF copy of the book.
